PERSONAL PROFILE

An Aspiring and passionate Web Developer who wants to collaborate with the team, know their dreams, and to learn and grow along with the organization.

WORK EXPERIENCE

Backend Web Developer (NodeJS) | May 2021 - June 2021

- Responsible for developing banking web based applications for the admin and users with NodeJS and SailsJS.
- Server Deployment in Amazon EC2 instance using ssh tunnelling. Database Management using MongoDB Compass and Mongo Shell.

Vintek Solution / Alchemy (Project)

Backend Web Developer (NodeJS) | May 2021 - June 2021

- Worked in a US Project relevant to Banking. Took ownership for three projects. Responsible for developing banking web based applications for the admin and users with NodeJS and SailsJS.
- Server Deployment in Amazon EC2 instance using ssh tunnelling. Database Management using MongoDB Compass and Mongo Shell. Troubleshooting and bugfixing. Adding features to the application based on client's requirement.

Astutex Technology Solutions

Node Developer | Dec 2019 - Apr 2020

- Server side programming with Node.js for a React Web Application. Writing API in MVC pattern with Express Framework. Interacting with NoSQL Database (MongoDB) with mongoose(framework) npm package.
- Building a chat application for web, using Websockets. Implementing QueueJobs using RabbitMQ. Implementing CronJobs using node-cron package. Server management and deployment on Heroku.

Pama Consultant

Node Developer | Oct 2019 - Nov 2019

- I built an on premise node application for the employees with Nodejs and google sheets api. The employees can interact with their google sheets from the application. Each employee is given a unique sheet tab name. Once the user logs in, they can go to the form and then fill in the data they want to insert, along with their tab name.
- When the user submits the form the google api will find the specified tab name, and then inserts the user data into the sheets. By this, the sheet's privacy of each employee is ensured. And the admin is given the full access. The user can perform CRUD operation only on their sheets.

Wikiance

Web Developer (Intern) | Jun 2019 - Oct 2019

- I initially worked on developing Responsive Email Templates using HTML5, CSS3. Later on I used MJML (Mail Jet Markup Language) for Responsive Email Design.
- Out of my own interest, I moved to backed development. Using Node Js (nunjucks, nodemailer) and TypeScript, I was responsible for Email templating and integration. The Integrated Email templates has to be sent to the users using SMTP Protocol Gmail Client.

PROJECTS

2D Web Game Development

Developer | 2017 - 2019

- I learned Javascript by developing simple 2d games and animations along with HTML5 Canvas.

EDUCATION

Chennai Institute Of Technology

B.E in Electronics and Communication | Sep 2014 - Apr 2018

- Cumulative GPA: 7.5
- Concentration: Web Technologies
